# The best of Medline's featured products

## Sliding Transfer Bench

Slides from one side to the other to make transfers to/from the tub or shower, easier.

Page 59

## 5-liter Oxygen Concentrator

Provides oxygen therapy to those who suffer from certain chronic conditions.

Page 6

## TriGlide® Folding Cane

A pivoting base mimics ankle movement, which helps with balance and mobility on most surfaces.

Page 17

## Upright Rollators

Give those with limited mobility the freedom to walk comfortably upright without leaning over.

Page 24

## Martha Stewart Bed Assist Bar

Assists those who need help getting in and out of bed, with a soft grip for comfort.

Page 66

## Martha Stewart Overbed Table

Stylish, easy to assemble, multi-use overbed table with a basket for storage.

Page 67

**Bariatric Trapeze with Wheels**

Up to 1,000 lb weight capacity with a 4-piece sub-assembly and tool-free design to help reduce setup time.

Page 67

**Universal Hinged Toilet Seat Riser**

For those with difficulty getting up from the toilet to take the stress off knees and hips. Lifts up like a regular toilet seat.

Page 60

**European-style Rollator**

Go the distance with this reliable walking aid that also provides a comfortable place to sit; with storage.

Page 24

**Blue Folding Paddle Walker**

Ergonomic release paddles make it easy to open and close from a seated position; 300 lb capacity.

Page 29

**Steel Transport Chair with 12" Wheels**

Enjoy convenience and transportability without sacrificing safety and comfort.

Page 35

**K4 Guardian® Wheelchair**

Desk-length, swing back and removable armrests with swing-away foot rests.

Page 45

# Five-liter Oxygen Concentrator New

When health-related conditions cause breathing-related disorders, individuals may be prescribed an at-home stationary oxygen concentrator. Oxygen concentrators filter surrounding air, compressing it to the required density and delivering purified medical-grade oxygen into a pulse-dose delivery system or continuous stream system.

**Medline is excited to introduce** a compact, lightweight and quiet oxygen concentrator for 24/7 medical and home use featuring superior performance and compliance.

O2-5B5LBK

Cabinet filter

Humidifier bottle holder

HEPA intake filter

Recessed flow meter

## Features

- Compact and lightweight, it moves with the user effortlessly and stabilizes easily with locking casters
- Quiet motor provides 24/7 continuous oxygen flow between 0.5–5 L/min
- Includes a purity oxygen percentage indicator and internal power failure alarm function
- The compressor is equipped with a thermal overload protector and pressure relief valve for additional safety
- 8-ft power cord; 3.9-year warranty or 10,000 hours of use, whichever comes first; Black

# Crutches

Crutches are the traditional mobility aid for when one leg is almost entirely non-weightbearing. All axillary (under the arm) models can be adjusted easily to both key measures: overall height and hand height.

1. Select a pair of crutches that's appropriate to the weight and height of the subject.
2. When sizing for axillary crutches, first measure from the ground to near the bottom of the axilla, or armpit. The crutch cushion should be 2" to 3" below the axilla. When standing straight, the cushion should not be touching the axilla. This measurement will be the overall crutch height. (See Dimension A)
3. Keeping arms at your side with a natural bend at the elbow, measure from the ground to the center of the wrist. This measurement will be the hand grip height. (See Dimension B)

## Premium Red-Dot® Axillary Crutches

- Lightweight and durable aluminum

# Canes

Standard canes with a single tip should be used for those looking for help with balance. Quad canes are useful for those looking to bear weight as they have a wider base. When sizing a cane, follow these steps:

1. Select a cane that's appropriate to the weight and height of the user.
2. With arms at side and a natural bend at the elbow, measure from the ground to the center of the wrist. This measurement will determine the ideal cane height.
3. Loosen the collar on the cane and press the push-button lock, slide the lower tube into or out of the body of the cane until you get to the wrist-height measurement, and let the push button "click" into the closest hole to the measurement. Tighten the collar (check and retighten the collar regularly).

## Premium Offset Handle Canes

- Offset handle design centers the user's weight over the strongest part of the cane
- Ergonomically designed to provide comfort and support for partial weight-bearing users
- Push-button, height-adjustable to find the perfect height
- Secured with a locking ring to provide quiet, rattle-free use and added safety

Item No.	Description	Wt. Capacity	Handle Material	Height Range	HCPCS	Retail Pkg.	Pkg.

# Rollators

Versatility meets personality with our superior group of rollators for the customer looking for more. From essential basics to premier collections, Medline takes your customers' needs and lifestyle into consideration. Engineered with design features that solve specific problems for the user in unique colors and additional accessories. Discover both functional and luxury in a product category that historically only focused on utility.

Rollators provide users with both a mobility aid and a seat to rest on when tired. Most rollators allow handle adjustment for a proper fit and comfort.

To accurately size the rollator handle height keep arms at your side with a natural bend at the elbow. Align your wrist to the handle as shown in the image.

Follow your rollator's manual on how to adjust the handle as rollator handle height adjustment mechanisms differ from one rollator to another.

# Walkers

Performance and style are found in our superior group of walkers, engineered with design features that help aid with specific mobility issues.

Proper walker sizing can help prevent poor posture and injury from misuse or falling. Medline walkers use push-button mechanisms, so they can be adjusted to various heights.

1. Select a walker that's appropriate to the weight of the patient.
2. Keeping arms at your side with a natural bend at the elbow, measure from the ground to the center of the wrist.
3. Adjust all four legs to the same height so that the handgrips match the same height as the wrist.

## Hemi Walkers

- Lightweight design allows the hemi sidestepper to be maneuvered easily—even with one arm
- Bi-level hand grip offers extra assistance

Item No.	Description	Wt. Capacity	Handle Material	Height Range	Hand Grip Width	HCPCS	Retail Pkg.	Pkg.
G07770X1	Adult Hemi Walker	250 lb (113.4 kg)	PVC	32"–36"	N/A	E0135	N	1 ea

# Transport Chairs

Transport chairs make it easier for caregivers to help individuals get around comfortably and easily. Compared to standard wheelchairs, a transport chair requires a caregiver to push the chair.

A transport chair is much lighter than a wheelchair and comes in a variety of colors and materials such as steel and aluminum. They are more compact, great for light use and getting from one place to another. The wheel sizes vary from 8" to 12" for durability and a 17" or 19" seat width fits everyone's needs.

MDS808200B

## Basic Steel Transport Chairs with 8" Wheels

- Durable steel frame with Black upholstery
- Includes detachable swing away footrests for maximum comfort and ease of mobility
- Back folds down for convenient transporting

Item No.	Description	Wt. Capacity	Leg Style	Arm Style	Seat Width	HCPCS	Retail Pkg.	Pkg.

# Wheelchairs

When choosing a wheelchair, there are many factors to consider including Arm Style, Leg Style, Weight Capacity and Seat Size. We've issued the charts in a way that makes it easier to select the right one.

**Arm Style:** Many users require the armrests in order to safely perform transfers in and out of a wheelchair. Individuals who can stand also use the armrests for support when getting in and out of the wheelchair. Properly fitted armrests when used help in maintaining a correct and functional seated posture. Arm Style choices include:

- Desk-length swing-back and removable
- Desk-length swing-back and height adjustable
- Desk-length height-adjustable swing-back and removable
- Full-length removable
- Full-length removable and height adjustable
- Full-length swing-back and removable
- Full-length height-adjustable swing-back and removable

**Leg Style:** The main purpose of these leg rests is to help increase comfort. There are two options for leg style:

- Swing-Away
- Elevating

**Weight Capacity:** Wheelchairs come with varying weight limits. Basic wheelchairs have weight limits of 250–350 lb, lightweight or pediatric wheelchairs have weight limits of 200–250 lb, and extra wide and bariatric wheelchairs have weight limits of 500–850 lb.

**Seat Size:** Seat widths typically range from 16 to 20 inches, with an average width of about 18 inches. Take seat depth into consideration as it will make a difference in overall comfort and usage. Seat depth is the distance from the back of the seat to the front edge and should be measured when the user is sitting straight up.

## Wheelchair Ordering Key

Type of Chair	Seat Width	Seat Depth (last digit only)	Upholstery Material	Arm Pad Style	Arm Function Type	Leg Rest Style	Additional Accessories (Optional)
K1	16"	6=16"	N=Nylon	1=Full Length	1=Removable	S=Swing Away	1=Anti-Tippers, Seatbelt, Brake Ext., Seat Ext.
K2	18"	8=18"	V=Vinyl	2=Desk Length	2=Swing Back	E=Elevating	
K3	20"	8=18"		3=Desk Length Height Adjustable	3=Permanent		
K4	22"	0=20"		4=Full Length Height Adjustable			
KR=Recliner	24"	E=Expandable 16-18"					
	Etc.						

Example:

K1 16 6 V 2 2 S -

Type of Chair	Seat Width	Seat Depth (last digit only)	Upholstery Material	Arm Pad Style	Arm Function Type	Leg Rest Style	Additional Accessories (Optional)
K1	16	6	V	2	2	S	-

Complete Item Number: K1166V22S

Accommodates 2" seat depth extenders

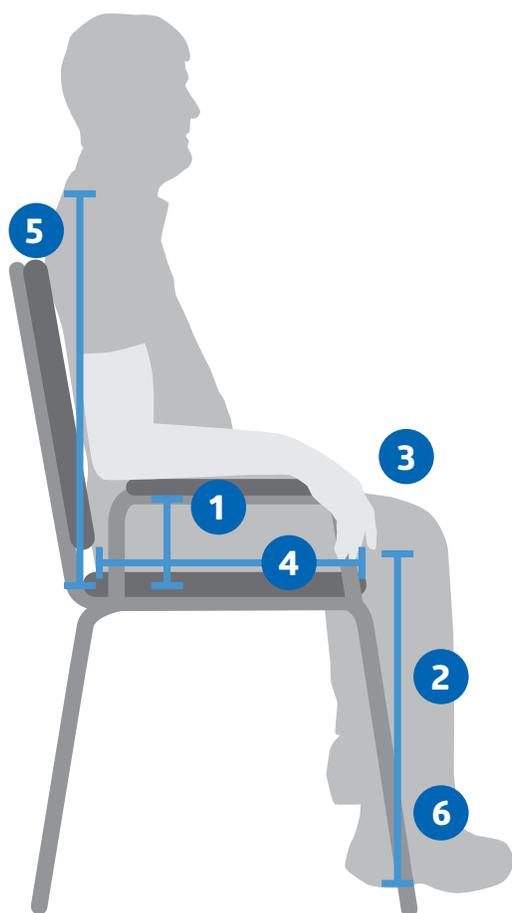

K1166V22S

# Wheelchair Sizing Guide

Determine the best fit for your wheelchair in six easy steps.

The most important step to consider when choosing a wheelchair is a proper fit. It can make the difference between recovering well and causing an injury.

## 1 Determine Arm Type and Height

- **Full-length arm:** Gives support to pivot transfers when the patient pushes off to stand.
- **Desk-length arm:** Makes it easy to move around tables and desks.
- **Height:** Measure from the elbow to the seat of the chair while holding arms up with elbows bent at a 90-degree angle. Use adjustable arms when possible.

## 2 Determine Footrest Style

- **Elevated leg rest:** Raises legs
- **Articulation leg rest:** Extends longer for taller patients.
- **Length:** Measure from back of the knee to the heel of the foot.

## 3 Determine Wheelchair Weight and Weight Limit

- **Weight capacity:** Choose wheelchair weight based on the patient's weight.
- **Upper body strength:** Choose lighter wheelchairs for weaker patients.

## 4 Determine Seat Size

- **Seat width:** Measure from hip to hip in a straight line and then add two inches.
- **Seat depth:** Measure from the back of the hip to the back of the knee while seated and then subtract one inch.

## 5 Determine Back Height

- **Standard back height:** Measure from collarbone to the seat while seated.
- **Taller back height:** Require additional upper trunk support to be installed.

## 6 Determine Floor to Seat Height

- **Movement:** Check if the patient uses feet to propel or move.
- **Height:** Measure the distance between the back of the knee and the heel.

## K1 Guardian® Wheelchairs

- Durable Hammertone frame; available in nylon or vinyl upholstery
- Hemi-height adjustable
- Accommodates 2" seat extender

# Bath Safety

Injury and health conditions can impair mobility and contribute to safety challenges in the bathroom. To help provide security and stability, Medline offers bath safety products that can be used throughout the bathroom.

## Commodes

Commodes can be used at bedside or as a toilet safety frame and elevated toilet seat over your existing toilet. Commode liners inside the commode bucket make clean-up easier and sanitary.

### 3-in-1 Commodes

- Steel frame
- Comes with seat, lid, bucket and splash guard
- Easy assembly
- Folds down for storage

# Shower Chairs

Shower chairs and transfer benches can make getting in and out of the tub or shower easier and more convenient. Shower chairs are placed inside the tub or shower, while transfer benches straddle the side of a tub, allowing one to sit outside the tub then move over the surface of the bench into the tub.

## Shower Chairs with Back

- Rust-resistant aluminum chairs are perfect for patients who have difficulty standing in the shower
- Backrest included for added stability, security and comfort

# Homecare Beds and Accessories

Medline offers high-quality, cost-effective homecare beds and accessories for the convenience and satisfaction of patients and caregivers.

Meeting or exceeding very stringent dynamic and static loading requirements, each bed is inspected, fully system tested and approved at maximum weight capacities. Recessed headspring supports and foot assembly reduce the chance of pinching and injuries. With some of the industry's lightest beds; transport, setup and storage is easier.

Our beds can be cleaned without having to remove the motor and end panels are easy to wipe down and keep clean. To complete your Medline homecare bed, we offer high-performance mattresses and easy-to-install, durable side rails. Patient mobility, transfers, and movement are all possible with our easy-to-assemble trapezes, bed assist bars and reachers.

## Medline Basic Homecare Beds

- Headspring supports recessed to resist pinching and injuries
- Foot assembly recessed to reduce chance of pinching
- Two-year warranty on electronics, limited lifetime warranty on the frame and welds

### ⚠ WARNING

#### Entrapment, strangulation, suffocation and/or fall hazards

Gaps in and around this product can entrap and kill. People with Alzheimer's disease or dementia, or those who are sedated, confused, or frail, are at increased risk of entrapment and strangulation. People attempting to climb over this product are at increased risk of injury or death from falls. Always make sure this product is properly secured to bed. If product can move away from bed or mattress, it can lead to entrapment and death.

### ⚠ WARNING

#### Suffocation/strangulation/entrapment hazard

If product is installed incorrectly or moves from its initial position, gaps can occur which can entrap and kill. People with Alzheimer's disease, dementia or other neurological conditions, or those who are sedated, confused, or frail, are at increased risk of entrapment, suffocation and strangulation.

- **NEVER** use unless the product is tight against the mattress, without gaps, and at least 12½ in. from headboard and footboard.
- **NEVER** use with children.
- **NEVER** use on toddler, bunk, water, or inflatable beds, or on beds with mattress toppers or soft compressible pads.

## Mattresses

- Cost-effective bed mattresses available in three different materials
- Durable vinyl covers

# Raizer® Mobile Lifting Chair

Now there's a better way to lift someone after a fall

- Gentle on caregiver—requires virtually no physical effort
- Fast—under a minute, one assistant can set up and raise a large adult from the floor to a standing position
- Easy to carry—two handy bags hold seven lightweight components
- Simple setup—color-coding guides the placement of components, and a loud click confirms each connection
- Easy to clean—cleaning's a snap with the smooth surfaces on all Raizer components

Item No.	Description	Pkg.
MDSRAIZER2	Raizer Mobile Lifting Chair	1 ea

## Technical Specifications

<b>Weight capacity</b>	330 lb
<b>Lifting time</b>	20–30 seconds
<b>Product weight</b>	28 lb total
<b>Charger</b>	Two pieces: Soniel 12v, 100–240V 12V car adapter
<b>Number of lifts on a full charge</b>	40 at maximum weight capacity
<b>Charging time</b>	Six hours
<b>Warranty</b>	Two years from invoice date

### All In 4 Easy Steps:

- 1 Place the seat motor under the person's knees

- 2 Attach components to the seat motor

- 3 Mechanically lift the resident using the console buttons or remote control

- 4 Transfer the resident to a walker or wheelchair
