Different Shelf Types

Chrome - A bright, shiny surface which comes from a plating process where hard chrome is deposited over a nickel surface. This finish is the most popular utilized due to it being extremely durable and able to be used in almost any type of application.

304 Stainless Steel - 304 Stainless with an electropolish finish represents the highest industry standard in the prevention of corrosion. This finish is highly effective in clean rooms, sanitary environments, or anywhere corrosion is possible.

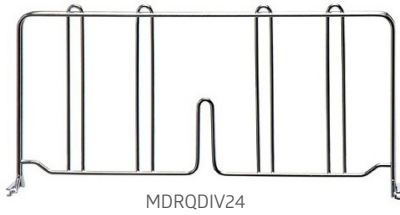

Proform - An economical solution for high humidity or wet environments. The carbon steel is treated with a zinc phosphate base. A hybrid epoxy with an antibacterial agent is electrostatically applied over the treated surface offering antimicrobial protection.

Flammable Safety Cabinets

Fireproof Insulation

is 100% gypsum, reinforced by a 1 x 2" lattice made of 14-gauge galvanized welded steel wire, providing complete peace of mind from fire, impact or explosion.

Field Replaceable Steel Panels

can easily be replaced in the event that any panel is damaged.

Finish

is an environmentally-friendly electrostatic powder coating applied to all sides, including bottom. The finish is scratch-resistant, providing a lifetime quality appearance.

Drawer Bodies

are built with high sides for use with hanging folder—no additional frames are needed.

Drawer Suspensions

are maintenance free and are guaranteed for life.

Drawer Locks

on all files provide general locking of all drawers through either standard key locks or UL®-listed high-security locks.

Drawer Pulls

are surface mounted to allow for extra insulation inside the drawer heads.

Insulation Between All Drawers

makes each drawer a separate insulated container.

2-Position Drawer Catch

allows access to certain drawers while others remain locked.

Drawer Heads

are formed of welded steel and filled with fireproof insulation, and are field replaceable.

Underwriters Laboratories® (UL®) Fire and Impact Rating on all file cabinets.

High-Density Storage

High-Density Sliding Track Systems

Corrosion-free, heavy-duty aluminum track systems allows for clearer aisles and walkways, eliminating tripping hazards.

PARTition Store Systems

High-density storage that is designed to give you instant visibility and easy access. These systems are constructed of wire to help minimize dirt accumulation and allow for better air circulation. Excellent for smaller spaces where various types of baskets and bins are required.

Wall Mount Cantilever Systems

Designed to create storage space when there is not enough floor space available. Can be assembled and installed with ease.

Sliding Top Track Systems

The corrosion-free v-groove floor track allows the shelving unit to move back and forth effortlessly and can help increase storage area up to 150%.

Specialty Shelving

Sterile Supply

Compacting Storage Solutions

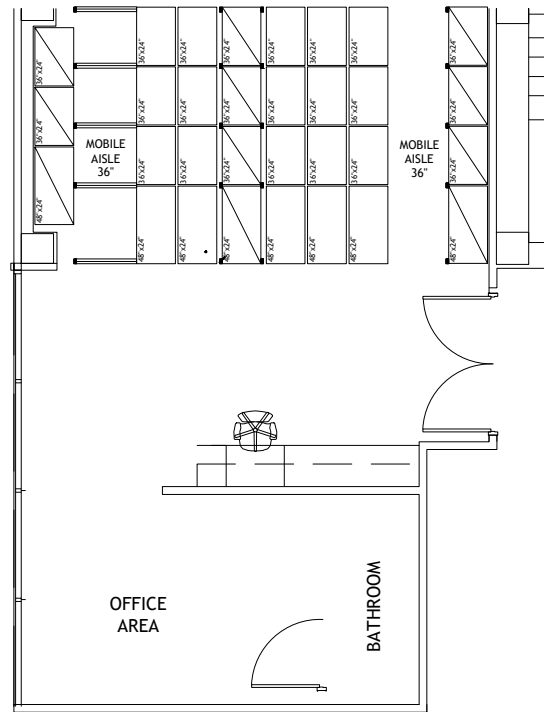

Create more space by compacting storage and eliminating fixed aisles. This, in turn, creates a single aisle system that increases storage capacity. The extensive product lines allow for many tailored storage solutions. We can help select the best system to optimize your space.

Compacting storage is perfect for:

- Filing and media storage
- Sterile storage
- Archival record storage
- Supply storage
- Housekeeping storage
