LOGIQUIP
Healthcare Storage Solutions

Our Story

LogiQuip has been in the healthcare storage solutions business since 1992 with principals that have been experts in the field for a combined 90 years.

Our sole focus is hospital storage and distribution systems. Our series of value-added services makes the life of the hospital clinician, logistics officer, purchaser and planner easier.

Our Mission

Because each hospital's inventory, supply, and storage requirements are similar in theory, yet diverse in practice and application, our mission is to provide true solutions for inventory, space, storage, and material handling problems on an individual basis. The solution to a specific problem may consist of a single cart or a complete supply storage system! Whatever the answer, LogiQuip makes it workable and efficient.

Our mission: Solving storage and distribution issues with the best products and designs possible. We believe "space" to be one of the hospital's most expensive capital assets; as such, our philosophy is to use every cubic inch of that very expensive space.

We focus on maintaining infection control standards and functional ergonomics, which are key areas in healthcare storage and distribution.

Our products work in synergy: What we've designed for the OR can work in the Cath Lab and vice versa. We have the most varied line of storage and distribution products for all areas of the hospital, from the receiving dock to the OR.

Our People

We have knowledgeable experienced representation across North America. A healthcare storage solutions adviser can meet with you at your convenience. We have highly trained customer service and CAD layout specialists in our Michigan home office. No job is too big or too small.
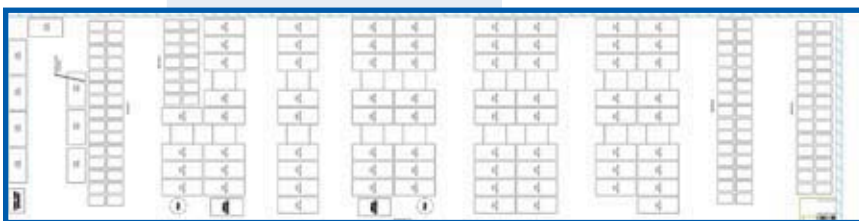

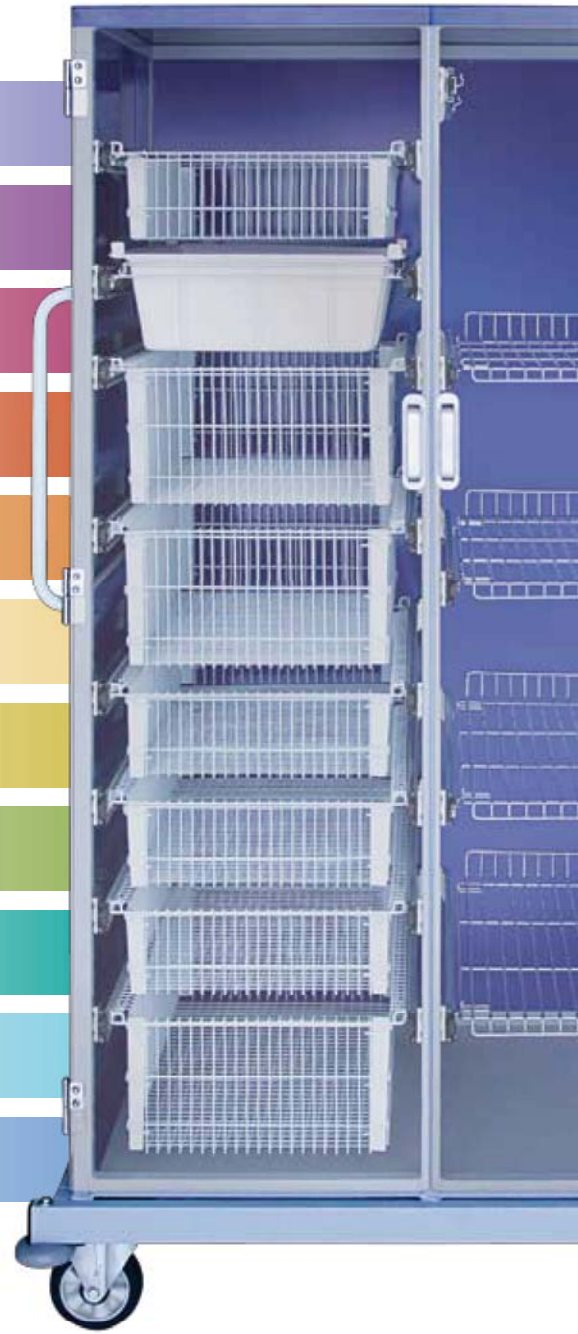

Typical Sterile Processing Layout Before: 1600 linear feet for storage

LogiQuip Sterile Processing Layout After: 2700 linear feet for storage

Choices - Par Wall,® Par Stor,® and LogiCell®

The space for storage in a hospital is at a premium, while supplies need to be accessible, organized and protected. LogiQuip works with key members in the clinical and administrative areas to ensure the highest level of capacity for supplies according to infection control standards, lean concepts and ergonomics.

Standard Units Include:

- 4 each 63"H posts.
- 4 wire shelves with split sleeves.
- Heavy-duty all-welded dolly fabricated with C-channel welded to steel plate frame.
- Non-marking wrap-around bumper.
  Dolly is available open, with premium epoxy-coated solid insert or with stainless steel solid insert. Inserts adhere to infection control standards and function as solid bottom shelves.

Other Standard Sizes Available on Request:

- Depths: 18" and 21"
- Widths: 42   and 54"
- Posts: 74"

5" Caster Models:

- 4 each 5" plate-style swivel non-marking polyurethane casters, two with brakes.
- Weight capacity is 750 lbs. (each caster 250 lbs.)

6" Caster "Heavy-Duty" Models:

- 4 each 6" premium ergonomic elastomere non-marking casters. All swivel, two with brakes.
- Rigid and directional -lock also available.
  Add suffix "BFP" for 1 swivel, 2 swivel w/ brake, and 1 directional locking.
  Add suffix "R" for 2 fixed, 2 swivel.
  Add suffix "FP" for 1 directional locking.
- 1200 lb weight capacity (each caster 400 lbs.)
- Recommended for "heavy-duty" transport applications.

LQ Wire Shelving and Carts

LQ Wire Shelves
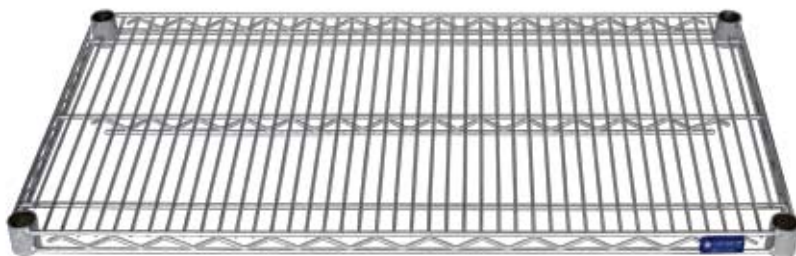

1836CH

Shelves

- Shelves are adjustable on 1" increments and come in a wide selection of sizes to suit every application.
- Chrome Plus Finish: Heavy nickel plating with hard chromium finish excellent for dry storage hospital applications.
- Duro Seal: Clear, heavy-coat finish over chrome, that is perfect for sterile packs, drapes, wrapped instrument sets and high-humidity applications. 10-year warranty against rust.

Weight Capacities

- Up to 48": 800 lbs. per shelf.
- Over 48": 600 lbs. per shelf.

Split Sleeve Adapters:

4 included with each shelf

SPLIT ADAPTER	MODEL #
4 Per Bag	PBAG

Posts

Posts are constructed of one-inch round (16 GA) tubing. All posts are numbered and adjustable on one-inch increments. Posts can be ordered without leveling feet for stem caster applications. *Special post lengths will require the next longer post size and a cut charge of $3.00 ea.*

- Simple Assembly: Each shelf comes with 4 corner split sleeve adapters which snap into the grooves of the post. The shelf slips over the top surface securing shelf and adapter to post.

Dolly Bases

Heavy-duty all-welded dolly fabricated with integral C-channel welded to steel plate frame. Non-marking wrap-around bumper.

Dolly is available in three styles: Open, premium epoxy-coated solid insert or stainless steel solid insert. Inserts adhere to infection control standards and function as solid bottom shelves which eliminates the additional wire shelf requirement.

Other Standard Sizes Available on Request:

- Depths: 21"
- Widths: 42" and 54"

Cart Covers

**Typical Corner Configurations**

How to Design Your Cart Cover

1. Accurately measure width, length and height (do not allow for clearance, give exact measurements, height to above casters.)

2. Determine corner style. (round end, round front or square- see image below)

3. Determine fabric and color.

4. Determine flap material. (nylon or clear vinyl window)

4. Determine flap closure. (velcro, ties or zipper)

5. Indicate any special options.

6. Make a simple illustration, if needed.

** Use our simple online tool at covers.logiquip.net

## Floor Track System

Floor Track System Benefits

- CAD layout options at no cost or obligation.
- We will not recommend a system unless users gain at least 20% more linear footage.
- Units custom built to fit all shelving, existing or new. (Save $$$ using existing)
- Choose from light-duty skates for individual unit tracks or heavy-duty carriages for multiple, back-to-back or mechanical assist units.
- No subfloors construction needed.
- Completely installed, including track install, transfer and assembly of existing units.
- System can easily be added-to and transferred with most parts re-used.

BEFORE
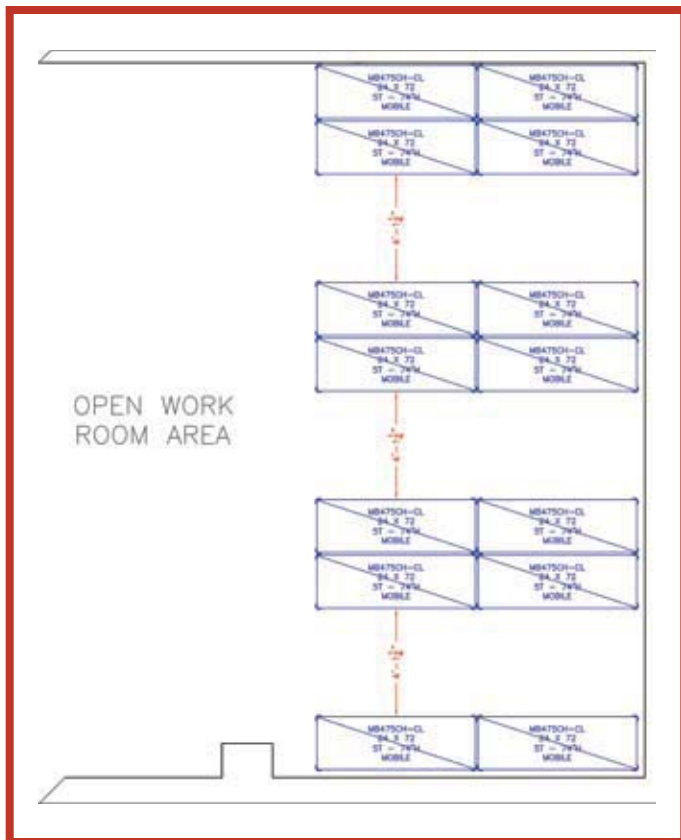

Traditional Static Storage 420 Lineal Feet Capacity

AFTER

Active Aisle System, 600 Linear Feet,
Increased Capacity 43% Over Static System

Floor Track System

CARRIAGE SYSTEM

- Carriages can be up to 12' in length and 4' in depth.
- Ball bearing design allows units up to 2000 lbs. (907kg) to move easily.
- "V" groove floor track is low-profile, cart-friendly and non-trip.
- Carriages: Satin anodized aluminum rails with roller bearing wheel assemblies.
- Track: Aluminum-extruded "V"-design (3/8" at highest peak) with hardened steel inserts. Reduces friction and provides positive carriage retention. Low profile end stops.
- Optional Mechanical Assist: Ergonomically designed easy move aisles, complete with built in aisle control.

Shown with User-Friendly Mechanical Assist

SKATE SYSTEM

- Simple and cost-effective solution.
- Easy to configure: Determine length of track needed and provide depth of carts used.
- Aluminum skates with HDP end stops and roller bearing wheels attach to bottom of posts.
- "V" groove floor track is low-profile, cart-friendly and non-trip. (same style as carriages) 3/8"H.

Low-Cost High-Density Storage on Skates

Wire Shelving and Carts

TSUN

TSUN is our premium wire shelving line: Smooth waterfall edge on front of shelf eliminates ripping of wrapped goods. Shelves adjust without any tools. Built-in endscreens. TSUN is also compatible with most standard wire accessories pages 31- 37. A MUST FOR EVERY STERILE STORAGE AREA.

Complete TSUN Cart Consists of:

Backscreen of 3″ x 3″ wire mesh

Five nickel-chrome plated wire shelves each with flat-face label holders.

Plastic Solid Bottom Shelf Cover

4 x 5″ poly swivel casters, two with brakes

3 joining bars (1 at top back, 2 at bottom)

Linen

Tubular Style Convertible and Exchange Linen Carts

Off-Site Linen Carts, Fixed and Drop Shelf Styles

These heavy duty carts have proven themselves through many years of durability in demanding over-the-road service. They come in two styles, convertible or fixed shelves. They are fabricated from 1-1/4" steel tubing and 3/8" wire rods all welded to form rigid frame to which the wire shelves are attached. Casters are 6" ergonomic neoprene.

LN Series Drop Shelf

In the shelf-flat position the cart is a clean linen transporter. Empty the shelves, drop and lock then vertically to form bin to hold up to 15 bags of soiled linen. At the laundry just open the rear doors and the bags tumble to the floor, no lifting, straining or pulling.

WR Series Fixed Shelf

This is an extra rigid cart since the back is fully enclosed with welded rods and tubes. Soiled linen bags set on shelves and are pulled off at the laundry. Front doors are optional.

Painted Metal Boltless Shelving

Open Unit

Boltless Shelving Units: Open and Closed

These units work well in medical records, in some stores applications or when an affordable solid unit is all that is required.

- U-shaped extra ribbed front and back edges for extra capacity.
- Double angle front and back 14 gauge posts.
- Clip-type shelving easy to install.
- Durable dove grey alkyd baked enamel.

Components for a Basic Open-Type Unit

- Starter unit consists of 4 angled posts, 2 pairs of side braces, 1 pair of back braces.
- Add-on unit consists of 4 angled posts, 1 pair of side braces, 1 pair of back braces.
- Determine number of shelves required.

Components for a Basic Closed-Type Unit

- Starter unit consists of 4 angled posts, 2 sets of side panels , 1 set of back panels (allow for 4" overlap).
- Add-on unit consists of 4 angled posts, 1 set of side panels, 1 set of back panels (allow for 4" overlap).
- Determine number of shelves required
  Available Heights: 76", 88", 100", 112", 124", 148"
- Shelf Sizes: 12"x 36", 12" x 48", 15"x 36" x 15"x 48", 18"x 36", 18"x 42", 18"x 48", 24" x 36"x 24" x 48"

Available Accessories

Footplates for carpet or tiled floor, baseplates for strength and appearance, angle reinforcements for heavy load, 6", 8", 10", 12" and 18"H dividers for most units, shelf bin fronts, label holders, drawers and double-swing doors.

Contact customer service with your requirements or your representative can help design a system according to your needs.
Painted metal shelves not sold in U.S.

Closed Unit

Racking with Wire Mesh Decking

Designed for heavy load storage in Bulk Stores or off-site warehouses.

- Featuring pre-engineered construction offering great strength and load bearing capacity with easy assembly and adjustability.
- Step-style beams are mig-welded featuring wrap around one-piece connector plate.
- Integral safety catch snaps and locks into place as beams are properly seated.
- Upright frames are mig-welded structures featuring channel, K-bracing. Punched every 2" for best vertical adjustability.
- Large 4-1/2" footplates for anchoring upright to floor.

Although it is best to have pallets off floor, full pallets of I.V. solutions can often be pallet-jacked into position on the floor below racking.

Wire Decking

Recommended for medical supplies. These heavy duty mesh panels feature 3" openings in 1/4" wire. Each grid is supported by two deck supports and should be tied in place. They are excellent for hospitals in that they do not collect dust, have superb light penetration and permit fire sprinklers to work more effectively. Finished in zinc plating.

Ordering Information

To begin you will require 2 frames plus quantity of beams depending on number of levels. Additional beams are then strung from second frame to third frame and so on to form a row.
Please contact your sales representative for further assistance.

Stores

Flow Rack/IV Rack

Supply/Solution Racks

Whether for IVs, supplies or linen flow racking ensures that supplies are properly rotated. Whether on or off-site, the concept fits perfectly with a hospitals stock picking requirements.

- Provides first-in, first-out usage, easy restocking from rear (picking and restocking may be handled at the same time).
- The system provides an ideal method of organizing products according to usage, volume and category.
- It works by loading product at the back, either by case or in containers, onto rolled track runways.
- As product is removed from the front the next case or container flows into picking position.
- Racks are sold in bays, each bay is 84"H x 60"W x 60"D. Each bay is complete with four or five llevels, uprights, frames, tracks and guides. Begin with a single bay and add-on as necessary.
- For IV solutions, the capacity of each 4-level bay is 80 cases of standard boxes. An additional level may be added but it would be a 72" from floor. If you choose to remove the bags from their cases and display in our plastic shelf boxes, then up to seven level capacity is available.

Flow Rack BackView

Attached Lid Containers

These well-designed, strong distribution containers are ideal for transporting supplies from off-site or within the facility. Standards dictate that cardboard cannot be in a clean utility room making these containers a necessity.

- Attached lids snap securely to protect contents from dust or damage.
- Containers stack and nest for space optimization
- Padlock tie at both ends to accomodate security ties.
- Some models have a variety of colours. Standard colour: Grey.
- Molded-in handles for easy lifting and carrying.

Acceptance

All orders subject to acceptance of Terms and Conditions of sale, regardless of the form in which submitted. All orders are quoted F.O.B. Galesburg, Michigan unless stated otherwise. Custom manufactured products may be subject to a deposit at the time of order.

Order Confirmation

To avoid duplication of shipment, the word "CONFIRMATION" or "CONFIRMING" should appear on all documents which are sent to confirm orders placed by telephone, fax or any other way.

Terms

Minimum order $50.00. Terms are Net 30 days (subject to credit approval). An annual service charge of 24% will be assessed on past due accounts.

Shipments

Shipments will be made F.O.B. shipping point and the buyer assumes responsibility for all damages in transit. Such damages must be declared at time of receipt, directly on the shipping documents, and claims must be filed immediately with the transport company. If after receipt of shipment, concealed damage is discovered, immediately notify the delivering carrier requesting an inspection. The inspection report should be used to support your claim against the carrier. Any claim for damage or shortage must be filed by you with the delivering carrier. Unless a preferred routing is specified at the time of order, shipment will be made the best way, transportation prepaid and added to invoice.

Returned Goods Policy

1.   All returns must be authorized.
2.   Each request must include the following:
     A. Customer name and address.
     B. Invoice number
     C. Invoice date
     D. Customer P.O. number
     E. Quantity, catalog number and description of item
     F. Reason for return
3.   Upon receipt of your request, a return authorization number will be issued and this must be clearly referenced with your return.
4.   The return shipment must be coordinated with a customer service representative, who will advise the proper mode of transport for the return.
5.   Returned goods may be subject to a minimum 20% handling charge based on state, condition of goods and reason for return.

Returned Goods Policy

6.   Returns will NOT be authorized for the following:
     A. Items purchased on a "special order" basis (unless original vendor will accept the return).
     B. Items that are custom manufactured.
     C. Partial units of sale.
     D. Items without original packaging materials.
7.   **RETURNS MUST BE PREPAID AND WITHIN 10 DAYS OF ORIGINAL SHIPMENT.**

Specifications

All dimensions and shipping weights are approximate. LogiQuip reserves the right to change specifications or substitute products of equal specifications without notice. The company also reserves the right to cease manufacturing or distribution of any product without notice. Manufacturer's specifications and prices are subject to change without notice.

Freight Classification

Freight Class is product specific and may vary from CL70 to CL250.

Installation

Installation of cabinets: Must be in compliance with all state and local code regulations and should be performed by experienced and qualified tradespeople. For best long term results and proper functioning of the cabinet doors and latches, the cabinets must be installed plumb and squarely true with adjoining cabinets. Compliance with all state and local regulations relative to anchoring cabinets should be confirmed by the appropriate hospital staff. Improper installation, or failure to comply with state and local regulations, may result in failure of the product and denial of potential warranty claims.

Warranty Statement

LogiQuip equipment is warranted to be free from defective material and workmanship under normal use and service for a period of one year from date of shipment to customer. During this period, LogiQuip will repair or replace (at its option) without charge, F.O.B. plant of manufacture, the equipment or any part thereof which factory inspection discloses to be defective. Shipments of defective material for repair must be sent prepaid.
