

Roam Carts

Purpose-built to maximize clinical space.

Engineered for capacity. Designed for movement.

In a hospital, space is always in short supply. Roam helps you make the most of every inch by storing more in less room, keeping supplies organized and secure, and rolling them wherever the work goes. One adaptable cart that turns crowded departments into places that run the way they should. Built in the USA to work as hard as the people who use it.

Left to right: 2-Room 4 General Storage carts, royal (SR4RGS); Room 2 Open Heart cart, white (SR2R0H)—all with InterConnect locks. Cover page: Room 2 General Storage cart, white (SR2GNU); Room 3 7-Cue Catheter and Supply cart, white (SR3G7CG); Room 2 Long and Short Catheter cart, white (SR2GLSC)—all with InterConnect locks

Configured for the way you work.

No two departments store supplies the same way, so Roam doesn't either. The FlexCell interior adjusts in 1.5-inch increments, allowing trays, drawers, baskets, and specialty inserts to be arranged around your workflow. Choose a preconfigured setup for a specific procedure or customize it from the ground up. As needs change, the same cart can be reconfigured instead of replaced, allowing it to move from one department to another and protecting your investment for years.

Powder-coated steel tops and bases give carts structural integrity and long-term durability.

Ergonomic aluminum push/pull handle improves maneuverability while reducing strain and fatigue for users.

Glass doors, roll-top doors, and no door carts let you match access and efficiency to every workflow.

Aluminum Composite Material (ACM) pairs a lightweight aluminum exterior with a durable core for rigidity, a smooth finish, and lasting performance.

Available in stainless steel to support easy cleaning and the hygiene standards of high-use environments.

Accessories come in multiple sizes and options to accommodate a wide range of supplies and specialty equipment.

FlexCell system reduces wasted space between accessories, delivering maximum storage capacity in a compact footprint.

Standard-height carts with optional sloped tops help prevent dust buildup, reducing maintenance and cleaning time.

InterConnect locks make it easy to protect contents and monitor access.

Standard 5" medical-grade casters (two locking, one directional locking, and one swivel) for quiet, effortless navigation.

White is the standard finish, with five additional colors and a wide range of laminate options available with ACM.

Statement of Line

Choose from three heights and five widths in glass door, roll-top, or no door configurations to fit virtually any space in your facility. No matter the size or shape, every cart shares the same components and FlexCell interior.

Room 1 Counter-height Carts

Procedure-specific Carts

For common procedures, Roam offers ready-to-go configurations. These preconfigured carts arrive with trays, dividers, and accessories already in place. Simply order by procedure or workflow, and the setup is done, so the cart is ready to use from day one.

Specialty Carts

When supplies are tailor-made for a certain task, their storage system should be, too. Roam specialty carts are purpose-built for specific storage needs of scopes, long catheters, sutures, and ECP supplies, so nothing is forced to fit. Secure, organized, and ready for the specialists who depend on them.

Built to last. Built to stay clean.

Roam carts are designed to withstand daily use without unnecessary weight. Made with lightweight aluminum (ACM) walls and a steel base, they deliver durability where it matters while remaining easy to move throughout the facility. All-stainless steel configurations are also available for areas requiring frequent disinfection and high-sanitization standards.

Optional sloped tops eliminate flat surfaces where dust can collect, supporting environmental-cleaning protocols and helping streamline turnover between cases. Smooth, non-porous surfaces, tight seams, and minimal exposed fasteners make cleaning faster and leave fewer places for contaminants to hide.

Left to right: Room Closed Suture cart, white (SRSCS); Room 2 Counter-Height cart, stainless steel (SRS2CG); Room 3 Supply cart, stainless steel (SRS3G)

Made for sterile environments.

When disinfection is constant and durability is non-negotiable, choose an all-stainless steel Roam cart. Available in four widths and three heights, it stands up to repeated cleaning and heavy daily use, with a minimal look suited to sterile environments.

5-knuckle hinge adds strength and durability, keeping doors aligned and operating smoothly.

Comes standard with no lock; optional keyed lock available.

Ergonomic aluminum push/pull handle.

Plastic bumpers absorb impact to protect the cart and your walls and doorways during transport and tight turns.

FlexCell system maximizes storage capacity.

Maximum storage, minimal footprint.

Roam fits more storage capacity into less floor space, anywhere and everywhere care happens. Available in multiple heights and widths, every cart is engineered to make the most of vertical and interior space without crowding the room. Because the whole line shares one platform, Roam can standardize storage across your entire facility, from cath lab to general supply, with a single, space-smart footprint.

Left to right: Room 1 General Storage cart, brushed (SR1GLGS); Room 2 Catheter cart, brushed (SR2GLC); Room 2 Stent cart, brushed (SR2GSTE); Room 4 Surgical Supply cart, white (SR4GSS)—all with InterConnect locks and slope tops

Flexible interiors.

At the core of every Roam cart is FlexCell, a modular interior built for adjustability in 1.5-inch increments. Shelves, trays, drawers, and dividers reposition in seconds, so you can lay out any cart exactly the way a workflow demands. And because the interior stays flexible, the same cart keeps adapting as needs shift, reconfigure it instead of replacing it, year after year.

Accessories

FlexCell works with a full range of trays, baskets, shelves, label holders, and specialty inserts, all sized to keep supplies visible, organized, and secure. Match the components to the work: divided trays for small items, deep baskets for bulk, and purpose-built inserts for catheters, scopes, and sutures. Whatever a department stores, there's a configuration for it.

Secured. Tracked. Connected.

Roam's optional InterConnect lock system gives authorized staff fast, shared access with no keys to issue, lose, or rekey. Add proximity badges and the right people gain instant access while everyone else stays out. Innerspace Cloud turns that access into visibility by letting you set permissions, see who opened each cart and when, and monitor equipment access from anywhere. It's the backbone of diversion prevention, audit trails, and supply accountability.
