cmecorp.com

Built in the USA to deliver strength, safety, and performance. The MayaCode Cart was engineered to provide all the equipment, supplies and emergency medication needed for prompt emergency care. The MayaCode Cart is made with heavy gauge steel to withstand the most demanding clinical environment and features bright red drawers to help staff quickly identify emergency supplies. Easy-clean drawer handles with a silver ion antimicrobial additive embedded and optional seamless drawer trays can help to minimize healthcare associated infections (HAIs).

MAYACODE CART OPTIONS

The MayaCode Cart is available in different heights which allow for 21", 24", 27", or 30" of overall drawer space. The MayaCode Cart comes standard with Breakaway Lock Bar and 30" of drawer space: configured with (3) 3", (2) 6", and (1) 9" drawers (however MayaCart can be configured in any drawer configuration that best meets your clinical needs). A pass through pullout work surface provides additional working space and quiet close drawer glides can help improve patient satisfaction scores. The MayaCode is available in any of the six colors shown on page 3.

ANTIMICROBIAL ENHANCEMENT

We are committed to helping our customers maintain a clean and safe environment for their patients and staff. The drawer handles on all MayaCarts have a silver ion antimicrobial additive embedded in them. The keypad, included with MayaCarts that have an electronic lock, has a Microban® antimicrobial surface coating to help keep surfaces cleaner in between cleanings.
