

CME BASSINETS

CME bassinets are renowned for their reliable 304 stainless steel, welded construction, durability and optimal performance. The inverted "U-frame" bassinet design provides a stable and comfortable resting place for newborns. Standard 4" ball bearing swivel casters, with two brakes, ensure safe transport. Bases are available with various storage choices such as shelves, drawers and cabinets. Cabinets can be closed for more security or open for easier access. The clear acrylic infant basket includes a card-holder for baby identification and rests in specially formed support rods so it can be set in the flat or Trendelenburg position.
