

Two-Shelf Collapsible Wire Utility Cart

SKU | WSCC-2

The Two-Shelf Collapsible Wire Utility Cart combines durability and functionality for food service, industrial, and commercial applications. Designed to streamline tasks, it makes daily operations smoother and more efficient.

Equipped with an ergonomically shaped handle and full-swivel 4" TPR casters, this cart offers effortless maneuverability and stability, with two locking brakes for added safety when stationary. Its collapsible design allows the shelves to fold down with a single pull, making it a space-saving solution for tight areas and easy storage or transport.

Thanks to its updated design, which allowed us to remove one of the middle support columns, the Two-Shelf Collapsible Wire Utility Cart now provides unobstructed access to the lower shelf.

Open Access Design

Updated design removes a middle column, allowing for easier access to the lower shelf

Folding Shelves

Collapsible shelves for compact storage and effortless transportation

Stable, Swivel Casters

Smooth-rolling cart with 4" full-swivel casters; two equipped with locking brakes for stability when loading and unloading
